Esteemed Super Validators:

As we near launch we are working to conclude a number of details in the MainNet configuration, including changing Super Validator weights, updating MainNet acceptance criteria, and resolving bugs found in the final rounds of tests.

During the process of incorporating the Super Validator weight changes agreed on in CIP-0009, CIP-0010 and CIP-0011, the Super Validator operators identified a specific edge case and associated bug that would allow a Super Validator under that edge case to mint more than their allocated share of Canton Coin. A fix for this error has been delivered to the Super Validator operators.

To keep things on track I'd like to propose moving a little more quickly on this CIP than our normal pace. In particular I'd like to get your comments on this CIP by Monday evening, May 27th. Given that Monday is a holiday in the US, I'd like to recommend that the Super Validator operators set up the on-chain vote proposal to implement this change today, Friday May 24th, instead of waiting for the CIP response process to conclude.

The deadline for objections to this proposal will be 6 pm US Eastern (NYC) time on Monday May 27th.

The on-chain vote will take effect at 8 pm US Eastern (NYC) time on Monday May 27th, two hours after the conclusion of comments on this CIP. It will be possible to revert any on-chain vote cast by the operators before that deadline, if required.

For the record, Digital Asset votes in favor of CIP-0013

Thank You

Eric sent on behalf of Eric Saraniecki by Wayne Collier

to da-wallet <

I submitted a corrected vote proposal on Friday evening, March 24th, to implement CIP-0013. It will take effect on Monday evening, March 27th.

Itai Segal was my second on this proposal and double-checked everything before submission.

Wayne Collier
