

Happy Saturday, Super Validators

As many of you know and have assisted with, we have been in discussions with a number of custody and wallet providers to see who would be willing to commit to supporting Canton Coin ASAP. I'm pleased to present a robust and complementary group for membership as Super Validators at the Tier 3 level.

Please vote on adding Copper, Dfns, and MPCH as Tier 3 Super Validators.

Keep an eye on the CIPs as I expect we may have 2 more big name joiners jump in the pool over the next couple days and round out our founding group.

Thank you

Eric

CIP-0015 :

Summary

- Add Copper as a T3 (weight 1) Super Validator

Proposed Changes

- Add Copper to the SV weight pool
- Increase Foundation node weight to account for Copper
 - To meet the tight timelines, Copper will join the initial launch on the Foundation's multi-tenant node operated by IEU
 - As Copper is *not* going to be an SV operator on launch, they will have no direct governance votes until they operate their own SV
 - Foundation's minting weight will be bumped +1 to account for Copper
 - Weight 1 of the total Super Validator minting weight on the Foundation node will be designated to the Copper Validator
