Great - thank you everyone - CIP 0015, 0016, and 0017 pass.

I'll be sending CIP 0018 in a new thread momentarily.

Thank you - anyone care to be the 5th and deciding vote on these?

Good catch - thank you

Attached an updated PDF - versioned it in case there is another mistake found

Looking forward to these being done in git instead of docs...

I will be voting a bit later today.

As a formality, there is incorrect information in CIP-0016.

Specifically, in the "Before CIP-0016 (assuming CIP-0015 passes)" section, Cumberland-2's weight is listed as 22.0 and Global-Synchronizer-Foundation's weight is listed as 13.0. We believe Cumberland-2's weight should be 12 there, GSF's should be 22. Everywhere else in all of the CIPs seem to have the correct information, including the After weights in CIP-0016. Can we update the documents to reflect the correct information.

Thanks

Chris

Happy Saturday, Super Validators

As many of you know and have assisted with, we have been in discussions with a number of custody and wallet providers to see who would be willing to commit to supporting Canton Coin ASAP. I'm pleased to present a robust and complementary group for membership as Super Validators at the Tier 3 level.

Please vote on adding Copper, Dins, and MPCH as Tier 3 Super Validators.

Keep an eye on the CIPs as I expect we may have 2 more big name joiners jump in the pool over the next couple days and round out our founding group.

Thank you

Eric
